Toolkit

Wiki *Enhanced dissipation for passive scalars*

8 November 2026

Page team: to be named · Status: skeleton
Discuss on Zulip: #toolkit, topic "Toolkit".

Classical facts used by the proofs, each stated once with its proof or a reference; the proofs elsewhere link here. A statement comes here when several proofs use it, or when it holds in more generality than one result; a step used by one proof only is a claim inside that proof.

1 Notation and definitions

[The notation used throughout the wiki, and the definitions (dissipation time, enhanced dissipation).]

2 General analysis

[Inequalities and functional analysis: Poincaré inequality, interpolation, semigroups.]

3 Enhanced-dissipation toolkit

[Tools specific to the subject, for instance spectral-gap and resolvent lemmas.]
